Dear Participants

I am writing to extend my great disappointment at missing September's education workshop in Mumbai and New Delhi which Chapters International expertly organised. I was hugely disappointed and saddened that I couldn't travel to India to be with you all and I would like to extend my sincere apologies for not being there.

Unfortunately I had an accident earlier this year in which I suffered a badly broken leg. That has subsequently led to major surgery, and the inevitable result was that I had to cancel a number of current and future appearances, events, meetings and interviews. Earlier on in June I was then firmly instructed by my medical advisers to suspend all my travel arrangements with an immediate effect.

As I have said I am devastated to miss this event as I was highly motivated to visit India and meet all of you in person. I am very much hoping that we will be able to reschedule this event for another time when I am fully recovered and able to travel freely.

I reiterate my apologies for this unpredictable situation and my deep gratitude to Chapter International for their top-notch event organization and their leadership in managing this issue.

I look forward to seeing you in India soon.

Florent Dendritae and Love!
